Company Purpose

At Planet of IT, we help SMBs migrate to the Cloud or optimize their existing Cloud solution. By leveraging a modern-day approach, our clients benefit from reliability and scalability to meet their needs now and into the future.

PLANET OF IT
BUILDING THE FUTURE

Our Solutions

Finance
- *Business-intelligent systems powered by AI*
- *Data security assessment and compliance*

Education
- *Scalable Cloud Computing solutions*
- *Developed Workflows for online learning*

Retail
- *Ecommerce stores and Omni channel solutions*
- *Inventory and Warehouse management solutions*

Healthcare
- *Integrated Electronic Health records (EHRs)*
- *Data warehousing for research labs*

Manufacturing
- *Enterprise & Supply Chain Management*
- *Asset Management and Optimization*

Who are We?

A combined 60+ years of (pure geek) experience enabling operations and growing businesses through digital transformation.

Insight driven consulting, implementation, and support

A foundation of integrity, teamwork, equality, and innovation

A focus on transparency and trust

The Current State

- ☑ Limited expansion with on-premises solutions

- ☑ High acquisition and maintenance costs

- ☑ Outdated systems and support

- ☑ Ineffective resource utilization

- ☑ Inability to consistently meet delivery/project deadlines

- ☑ Risks are harder to identify and mitigate

- ☑ Lack of value chain transparency

- ☑ Team members may be tied to traditional processes and resistant to adopt change
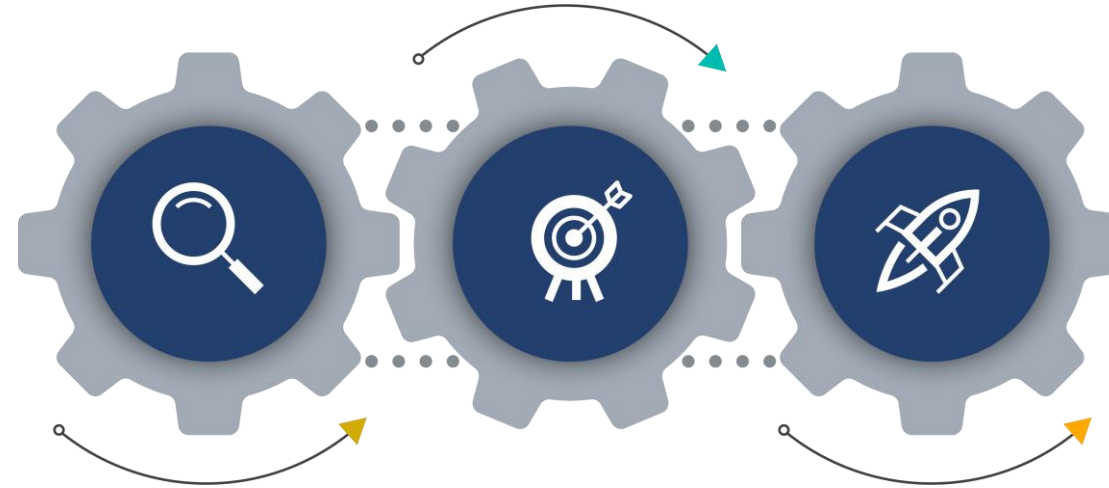

Future state from our partnership

- ☑ Unlimited potential for growth and expansion

- ☑ Productivity improvements and flexibility with resources

- ☑ Real-time data management and a centralized digital workspace - improving team collaboration.

- ☑ No upfront costs—only paying for what is used

- ☑ Reliability, profitability and competitiveness improve

- ☑ More granular risk assessment supports more effective disaster recovery plans.

- ☑ New revenue streams are identified

- ☑ There is visibility and performance   measurement across the entire value chain.

How we work

Assessment

Through a defined process, we do a thorough discovery to learn about your current state and build a detailed roadmap to the desired state.

Planning

Instead of simply lifting and shifting your resources to the Cloud, we take time to analyze and determine the right fit for your applications and workloads in the Cloud, ensuring to build a reliable, scalable, and cost-effective model.

Implementation

Initiating from a pilot migration, we take you all the way to the production ready system.

We provide a robust, transparent digital roadmap to take you from current to future state. Our promise…

☑ Our solutions Increase ROI and reduce business risk.

☑ Our solutions drive deep operational and competitive insight.

☑ We always build control into your systems without third-party dependency.

☑ Work with us and you will see increased business agility and a platform for growth.

The Planet of IT Promise

Services

We don't just "Lift and shift" to the Cloud, instead we assess, plan and implement the right fit for each of your digital resource in the Cloud.

Advisory

- Planning and Assessment
- Roadmap to desired state
- Fractional Leadership
- Workshops

Business Connectivity

- Azure Active Directory
- Identity and Access Management
- Microsoft 365
- Azure Virtual Desktop

Cloud and DevOps

- Azure and AWS Cloud
- Infrastructure as Code
- Continuous Integration and Deployment
- Site Reliability Engineering
- Microservices with Kubernetes

Thank You
